

Dear Parents:

The Elizabethtown Child Care Center health policies require written instructions from a licensed health care provider each time he/she prescribes or recommends a medication for an enrolled child. There is only one exception:

For fever-reducing medications, or select over the counter medications, the program may use an order from a licensed health professional that provides instructions for appropriate dose and method of administration to give the medication to any child in the program whose parents provide written consent for use of that medication.

*\*Please note that teething gels and teething tablets will not be administered\**

Please have your physician sign the attached blanket permission slip to add to your child's file. It will still be necessary to sign our medication log with amounts and specific times for administration of a fever reducer or over the counter medication.

Child's Name \_\_\_\_\_ Age \_\_\_\_\_ Weight \_\_\_\_\_

Medication	Dosage	Time Schedule	Method of Administration
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

Please list name of medication and side effects we should be aware of:
